

The ProMount iPad Document Camera stand allows for usage of an iPad as a document camera. By utilizing the features of the iPad, operators will have the ability to use the fabricated stand just as they would a typical document camera, without the myriad of buttons, bunches of cables or complication of different software. Up until now, there was no effective way to use an iPad as a document camera, without just holding it in your hands. Now, with The Betty, simply sliding your iPad into the tablet holder allows for the stability and clarity that once wasn't available.

*“NOW WITH THE Betty, THERE IS AN INEXPENSIVE WAY TO USE YOUR IPAD AS A DOCUMENT CAMERA, WEB CAMERA AND OTHER CLASSROOM DEVICE – ALL IN ONE!”*

- Erin Woods, Math Teacher

Black nylon connection pins allow for tightening and loosening of the tablet holder as needed

Mast pole that measures 22" high, allowing tablet holder to slide entirely to the top of the mast (22") and as close to the surface (22") and as close to the surface as 3", for maximum zoom.

iPad easily slides into the tablet holder for quick usage

Whiteboard surface base that fits 2 8.5" x 11" pieces of paper for maximum surface area and reading ability. Surface is made of whiteboard paint and can be erased and used over again
